## They Might Be Giants

Everybody at the party is a many-sided polygon  
When a guest arrives, they will count how many sides it has on  
Standing by the window over there  
There is a shape with four sides so it's a square  
And the one who has nine is looking fine  
And its name is Nonagon

Everybody turns just in time to see the pentagon arrive  
Counting up the sides, it is clear the pentagon has five  
Chatting in the kitchen we see  
There is a triangle whose sides number three  
And is talking to the shape that has nine  
Who is known as Nonagon

Nonagon

Nonagon lets in a guest who has shown up late  
Its name is Octagon and its sides add up to eight  
Turning the music on  
Is a six-sided hexagon  
And they all get in a line and do  
A dance called "The Nonagon"
