Thieves Like Us

Won't you give us something to say?
Won't you help us cut across scene lines?
Won't you come and show us some face?
Can't you get us out in the meantime?

There's a party over there
And it makes me overlook
This slack parade of a days
This lack of city space

See you walking out the room
Moving to another place
I'm left paralyzed
Unflirting

Won't you give us something to say?
Won't you help us cut across scene lines?
Won't you come and show us some face?
Can't you get us out in the meantime?

We'll be lying out on the folds
And we're counting on you to pass time
Won't you give us something to say?
Can't you help us out across mean lines?

Forever and ever
The 60s, the sunshine and movies are heaven
You won't ever find 'em here
They're only in our dreams

Shot down, shot down
So violent

Won't you give us something to say?
Won't you help us cut across scene lines?
Won't you come and show us some face?
Can't you get us out in the meantime?

We'll be lying out on the folds
And we're counting on you to pass time
Won't you give us something to say?
Won't you help us out in the meantime?
