Can we get the chemicals in  
Cause anything's better than this  
Mix it up with vicadin  
Cause anything's better than this  
Little cuts on your wrist,  
To try and get back the feeling  
And no real friendships exists  
That would be an understatement

Tell me the reason  
(cannot show up)  
Friends you knew before  
(hello, how have you been?)  
This is your season  
(oh I give up)  
Just show up  
(I can't knock on your door)

Cause I keep bad company  
I'm trouble  
So go on stay away from me  
I play the villain  
You don't know where we've been

Can we get the chemicals in  
Old english is making me manic  
I go to Suicide girls again  
To check on anything I missed  
The stitches don't even begin  
To even stop up the bleeding  
Can we get the chemicals in  
Cause anything's better than this

The city is dying  
(at least to me)  
The city is dead now  
(my kingdom for a friend)  
Are you even trying  
(to find some peace)  
Don't need a reason  
(I get some living in)

Cause I keep bad company  
I'm in trouble  
Last chance stay away from me  
I play the villain  
You don't know where we've been

Lining em up again  
Keep saying this will end

I keep bad company

I'm in trouble  
Keep saying this will end  
Lining em up again  
You know I'll never change
