Thirsty Merc

If I could take some time and throw it in the air I have a feeling it would land and you'd be there I wanna see you just as much as I don't wanna let you go 'coz the days get longer and I ride 'em back to the days we took it slow

No money- that's ok babe I know you're still my lady It'll take much more than that to make me lose the faith now You got me so excited I'd love you unrequited You'll see, you'll see -- I'm gonna take my story to you now

It's in my D.N.A. to want you It's in my blood and mind and self It's in my D.N.A. to want you It's fundamental, it's fundamental

Don't wanna be personal, but you got reality And that incredible knack which makes me wild and free And you're so beautiful that word is redefined In the dictionary there's a picture of you and it now means one of a kind

You don't need clothes or makeup I never wanna break up This is a snapshot of the place we lay beside each other We don't need laws abiding I see your troubles hiding You'll see, you'll see - I'm gonna take my story to you now
