

# Coming to Get You Nowhere

This Is the Kit

There was too much noise  
I'll meet you back there in the dark  
Turn it, turn it down  
Time to procrastinate fast  
Are we useful yet?  
Putting the pressure on hot  
Future came and left  
Everything else is the past  
Everything else is the past  
Everything else is the past

You don't need to feel  
You won't even see  
You won't need to be (Anywhere else when they're)  
You don't need to need  
Anything from me  
You won't even see  
Anyone else when they're

Coming to get you nowhere  
Coming to get you nowhere  
Coming to get you nowhere  
Coming to get you no

Turn the timing off  
Reverberate slightly obscene  
Careful clarity  
Fogging our breath on the screen  
You weren't the only ones  
The only ones there on that team  
Turn it, turn it down

Energy, energy, please  
(Energy, energy, please)  
Energy, energy, please  
Energy, energy, please

You don't need to be  
You won't even feel  
You even see (Anything else when they're)  
You don't need to be  
Anything to me  
You won't even feel (Anything else when they're)  
You don't need to be  
You won't need to see  
You won't need to need  
Anything when they're

Coming to get you nowhere  
Coming to get you nowhere  
Coming to get you nowhere  
Coming to get you no

Turn it, turn it down
