Hotter Colder

This Is the Kit

Out went all the lights, and up jumped all the spirits
Up jumped all the spirits, out went all the lights
Then was someone riding, riding on your shoulder
Guiding you through darkness, playing hotter colder

Creature in the dark, your guiding is so clumsy
Fragile sanity, you're treating us so roughly
No I disagree, she listens as she sees
Sees you getting colder, sees you getting further

Do do doo -

It was your own shadow moving through the water
It was your own shadow moving through the water
Water that was dark, a darkness that got deeper
It was your own shadow moving through the water

Do do doo -
