

Proximity

This Wild Life

It was all my fault, we broke off on a call
Knees on the asphalt, took my verbal assault
People don't change, we just hide
Our shame in the shade

Push and pull, pull you away from me
Rise and fall, fall out of love with me
As your gravity crushes me

Magnetic pull, tugged me into you
Such lusting fools, couldn't follow rules
Our polarities collide
No proximity

Push and pull, pull you away from me
Rise and fall, fall out of love with me
As your gravity crushes me

I still don't know how magnets work
There's something that's deeper within the Earth
That pushes and pulls you away from me
The force that drew us near now prevents proximity

Push and pull, pull you away from me
Rise and fall, fall out of love with me
As your gravity crushes me
