

Through All The Gloom

This Wild Life

Easy come, easy go until you came along
Like the sun, only one can burn through all the cold
You were my medicine when my head needs settling
So I took that steady hand, made it permanent

Through all the gloom it's you and
I'll never need another, just you and me forever, yeah
If you're running on fumes, I'm tried and true
Through stormy weather, 'cause after the rain comes the bloom

Got the house and the dogs, soon kids will come along
I'm just grateful to watch as you become a mom
Your love is common sense when my head is full of stress, so
I took that steady hand, made it permanent

Through all the gloom it's you and
I'll never need another, just you and me forever, yeah
If you're running on fumes, I'm tried and true
Through stormy weather, 'cause after the rain comes the bloom

All your love give me forever
All of your pain and pressure
No one can love you better than me
All your love give me forever
All of your pain and pressure
No one can love you better than me

Through all the gloom it's you and
I'll never need another, just you and me forever, yeah
If you're running on fumes, I'm tried and true
Through stormy weather, 'cause after the rain comes the bloom
