

# When We Leave This Place We Leave Alone

This Wild Life

Life's a slow fade from color to grey  
Reaper gets closer every day  
And when my body fails me, don't resuscitate  
Let my soul softly slip away

Because I know one day we'll go  
But I hope it's me before it's you  
And I know I can't control  
When we leave this place, we leave alone

There's no more hurt, body becomes the Earth  
No dark, no light, just peace of mind  
And my ghost won't haunt you, I'll bridge you to someone new  
Hope he loves half as hard as I do

'Cause I know one day we'll go  
But I hope it's me before it's you  
And I know I can't control  
When we leave this place, we leave alone

But just leave a little light  
But just leave a little light

Dark, dark, dark  
There's still a part, part, part  
I left behind, just a little light  
When my heart, heart  
Starts to fall apart, part, part  
There's still a sign of my love left to find  
When it's dark, dark, dark  
There's still a part, part, part  
I left behind, just a little light  
When my heart, heart  
Starts to fall apart, part, part  
There's still a sign of my love left to find

'Cause I know one day we'll go  
But I hope it's me before it's you  
And I know I can't control  
When we leave this place, we leave alone

But just leave a little light  
But just leave a little light

'Cause I know one day we'll go  
But I hope it's me before it's you  
And I know I can't control  
When we leave this place, we leave alone
