

You Changed Everything

This Wild Life

I thought I met you just too late
Turns out the timing was up to fate

Cause I'm better now, not just broken and lost
You're the kind of kindness I've heard all about
For so long
Love, I've waited long

You could be my everything
The feeling I've been missing
Cause my world was gray before a girl just came and changed my ways
You could be my everything
My sun, my world and dreams
Cause my world was gray before a girl just came and changed my ways
You changed everything
You changed everything

It took some time to find my way
A few lovers lost some years of pain

Cause I'm better now, not just broken and lost
You're the kind of kindness I've heard all about
For so long
Love, I've waited long

You could be my everything
The feeling I've been missing
Cause my world was gray before a girl just came and changed my ways
You could be my everything
My sun, my world and dreams
Cause my world was gray before a girl just came and changed my ways
You changed everything

You changed everything
I was a broken vessel
A flower with its petals
Falling off, till the sun, it kissed my skin
You changed everything
I was a broken vessel
A flower with its petals
Falling off, till the sun, it kissed my skin

You could be my everything
The feeling I've been missing
Cause my world was gray before a girl just came and changed my ways
You could be my everything
My sun, my world and dreams
Cause my world was gray before a girl just came and changed my ways
You changed everything
You changed everything
