

All I Know

Thom Artway

All I know, is that we can't be together
All I know, is that I really should know better
Picking Polish off your fingers
Scuffing trainers on the back stairs
If you get close to her
If you get close to her, say hello

But all around is love
All around is love
All around is love
All around is love

For all you know, we'd be toxic for each other
For all you know, it's just something in the weather
Dust the dirt from off my jacket
Pick a stray hair off my shoulder
If you get close to her
If you get close to her, say goodbye

But all around is love
All around is love
All around is love
All around is love

All we know, is all we know
All we know, it's all we know
All we know, is all we know
All we know, it's all we know
But all around is love...

But all around is love
All around is love
All around is love
All around is love
