

Every Little Thing

Thomas Anders

Every little thing, every little thing
Makes me love you more
Every little thing, every little thing

Can't forget what you said to me
Stopped the rain - made me happy
Gave me wings to fly
Can't forget when you looked at me
There were fireworks in the sky

Every little thing that you say or do
Makes me love you more
You're a dream come true
Every little thing that you give to me
My heart will double it all and give it back to you

When I hold you the stars come out
Got no worries no fears and time is standing still
You're the one I have dreamed about
Ask me to fly and you know I will
You're my own special miracle
And I know that you're my once in a lifetime love
If we happen to be apart
Baby you're all I'm thinking of

Every little thing that you say or do
Makes me love you more
You're a dream come true
Every little thing that you give to me
My heart will double it all and give it back to you

Suddenly
The other girls mean nothing to me
It's easy to see
Look at you
Nobody smiles the way that you do
Girl it is true
There's no one like you

Every little thing that you say or do
Makes me love you more
You're a dream come true
Every little thing that you give to me
My heart will double it all and give it back to you

Every little thing that you say or do
Makes me love you more
You're a dream come true
Every little thing that you give to me
My heart will double it all and give it back to you
