

Right Here Right Now

Thomas Anders

Tell me do you feel sad,
are you worried or mad?
Do you feel lonely every night?
Well, if this is the case
Put a smile on your face
because I'm on my way to you,
Here we are, just about to start it
You and I can make it come true

Right here, right now
Together in forever in the century of love
Right here, right now
You and me are ready for the treasure from above
Right here, right now
In the century of love

For the very first time
I feel this is divine
And I am glad you're here with me
We've got us and I know
We have places to go
All we've been dreaming of is real
Here we are, just about to start it
You and I can make it come true

Right here, right now
Together in forever in the century of love
Right here, right now
You and me are ready for the treasure from above
Right here, right now,
I will show you everything that you've been dreaming of
Right here, right now
in the century of love.

Now that I have started the fire
Now or never is finally here.
I have every thing you desire
So come with me, cause we -

- Right here, right now
Together in forever in the century of love
Right here, right now
You and me are ready for the treasure from above
Right here, right now
In the century of love
Right here, right now
Together in forever in the century of love
Right here, right now
You and me are ready for the treasure from above
Right here, right now
in the century of love.

Right here, in the century of love
