

# Gravity

Thomas Day

What do I, what do I do now  
Now that I know those eyes they pull me down  
What a mess, what a mess you've made  
I'm on fire, but I'll be fine if you stay

Won't you stay?

Loving you is like gravity  
You're the reason for it all  
And now I can't help but fall  
Like a fool I tried everything  
I went running for the stars  
Just to land back in your arms

Spending nights begging time to stop  
'Cause without you holding on I'd be lost  
And I'm not scared if I come crashing  
'Cause I'll be crashing into you

Loving you is like gravity  
You're the reason for it all  
And now I can't help but fall  
Like a fool I tried everything  
I went running for the stars  
Just to land back in your arms  
Arms, arms, arms, arms

Loving you is like gravity oh  
You're the reason for it all  
And now I can't help but fall

Loving you is like gravity  
You're the reason for it all  
And oh I can't help but fall
