

# Wildflower

Thomas Day

All your life, you've never had the time to explain the way you  
feel  
Had your tears with the late nights and lots of cheap thrills  
Waiting for the day that someone could take the wait

Off your shoulders, let it sink down twenty thousand leaves  
'Cause lately, on the land above, it's getting so hard to breez  
e  
Looking for a way just to know you'll be okay

Pretty face walking on by  
But I know the feeling of faking a smile  
'Cause I felt that way for a long time  
But here with me, you can unwind  
Wildflower, all you need's a little sunshine

Wildflower, all you need's a little sunshine  
Wildflower, all you need's a little sunshine

When you feel the walls start to cave in (Oh-ooh)  
Darling, just hold on, be patient (Oh-ooh)  
Try to remember when it's late December  
The summer ain't too far away (Oh-ooh)  
Maybe we can turn nightmares to daydreams  
Come crashing down in there safely, baby  
You say I'll run away but I won't, oh-oh-oh

Pretty face walking on by  
But I know the feeling of faking a smile  
'Cause I felt that way for a long time  
But here with me, you can unwind  
Wildflower, all you need's a little sunshine

Stay body tight through the highs and the lows  
My wildflower just watch you how you grow  
Do any weather, the rain and the snow  
You're not alone, you're not alone  
But here with me, you can unwind  
Wildflower, all you need's a little sunshine  
Wildflower, all you need's a little sunshine
