

John Wayne

Thomas Dybdahl

Don't dream what others do,
don't tell me you're in dreaming too
cause shit aint always how you planned it,
how you planned to break on trough
that aint you.

Life takes a different turn,
it may feel like your average crash & burn
cause shit aint always how you planned it,
how you planned to break on trough
and it aint always how you'd live your life
if you could live your life again.

And in time you'll find someone a way to better
yourself, a plan to break on through
and in time you'll find someone to help you through,
a guidance that'll do.

The man says it's gonna be all right
cause day by day it gets better (in time)
yes it's gonna be all right
cause day by day it gets better (in time)
day by day leave your worries behind
take the word of someone loving you.

It's all in place
don't dream what others do,
don't tell me you're in dreaming too
cause shit aint always how you planned it,
how you planned to break on trough
that aint you.

And in time you'll find someone a way to better
yourself, a plan to break on through
and in time you'll find someone to help you through,
a guidance that'll do
and you'll find it's exactly how you'd live your life
if you could live your life again
cause you found a friend.
