

Shine

Thomas Dybdahl

When the cold winds blow
And the colours flow
From the bright blue sky
We've come to know
Will you still feel that thing?
Flash of warmth, when I say your name
Please shine away, it keeps the dark at bay

When the sun hangs low
And hard times show
Will you still be here in between fears flowing?
Cause in the end
What's said and done
Is a tale all we've overcome
Please shine away, it keeps the dark at bay

Cause in the end, what's said and done
Is a tale all we've overcome
Please shine away, it keeps the dark at bay

Will you still, feel that same
Flash of warmth when I say your name?
Please shine away, it keeps the dark at bay
