

From the view up here  
Should I wait or disappear?  
Paramour another world  
To the end of time?  
I can't wait that long

Fate, luck or a curse?  
Connecting dots only to reverse  
You are you  
Stop living for two

Human connection  
Will you stay?  
Life exists to change  
What makes a human?  
The decay?  
Please take me away

From the depths eternally  
You are the light I just can't see

Taken I can't seem to find  
My way in your heart  
What really matters?  
Are we that far apart?

Peace is just so hard to find  
Why live in the past when I have you

Are we nothing at all

Human extinction  
Would you say  
Life exists to change  
What leads our future to decay?

Please take me way  
I've been keeping my distance  
I don't pity your anger  
Just give me your heart  
What makes you human?  
What sets you apart?
