

Say It

Those Damn Crows

I heard the rumours start today
Sadistic lies from you they came
Oh, 'cause I'm trying to work out what's your motive
The reason why we're here
Haunts me still
Haunts me still

Jealousy tore you open wide
Reveals the light inside you's died
Can you really truly know a person
The truth will out in the end
I return the knife you stabbed in my back friend

Say it to my face
Do you really wanna start a war
Say it to my face
Tell me what you're waiting for

The time has come to testify
Stand up, and face the reasons why
Can you feel it growing deep inside
As you battle with your shame
You can strike the match but I control the flame

Say it to my face
Do you really wanna start a war
Say it to my face
Tell me what you're waiting for
Say it to my face
You really want to play this game with me
Say it to my face
I'm not gonna take anymore

You're on the edge of sorrow
Hanging by a thread
Destroy the truth, in your own way
All the criticising, scrutinising
Focus on yourself

When you look inside are you filled with pride
The darkness pulls you in
The hate you hold on to
Infects and spreads within

Say it to my face
Do you really wanna start a war
Say it to my face
Tell me what you're waiting for

Say it to my face
You really want to play this game with me
Say it to my face
What the hell you waiting for
I'm not gonna take anymore
Say it to my face
