

## Face To Face

Thousand Below

I know we all try to just cover it up and then we pack it and r  
un

Another day set sitting under the sun

But your brain doesn't work like everyone else

You got everything you love but you're begging for help

You wear a fake smile, and you're seeing red

You're feeling hostile, and you're shaking again

Was it worth while? Sorta wish you were dead

I hope it's just a little bit of bad vi-, bad vibrations

'Cause I've been feeling up down, up down, every damn way

Take a deep breath, that's all they say

Up down, up down all in my face, I'm not like you

Up down, up down wouldn't you say?

Get a good grip and try to maintain

Up down, up but I'll never be face to face with you

I hope it's just a little bit of bad vi-, bad vibrations

Up down up but I'll never be face to

Face with me, your signals kill my frequency

Find your own salvation in my part of the netherworld

Face to face with me, your signals kill my frequency

Find your own salvation now

'Cause I've been feeling up down, up down, every damn way

Take a deep breath, that's all they say

Up down, up down all in my face, I'm not like you

Up down, up down wouldn't you say?

Get a good grip and try to maintain

Up down, up but I'll never be face to face with you

Faced with me, your signals kill my frequency

Find your own salvation, find your own salvation

Face to face with me your signals kill my frequency

Find your own salvation, find your own salvation
