

Until Ebb the Waters

Thrawsunblat

A great flood has beset this hill-fort
Water to our gates
The air is clear for miles around us, now an insula
That which would command
The valley stands alone
The land we know lies flooded below

Until ebb the waters, islands are we all
I see for miles around, islands are we all

There are those who need my aid
Those to whom I've sworn oaths
Signal fires, calls from the ramparts
I will send all I can to those to whom I'm bound
I will send all I can to those to whom I'm bound

Until ebb the waters, islands are we all
I see for miles around, Islands are we all
Until the waters ebb
The waters soon will ebb

Insular, one we are
One against these tides
Insular, one we are
Until ebb the waters high

Ancient winds all around, lift the osprey high
Ancient winds let her see our thousand fires bright
Ancient winds all around, lift the osprey high
Let her see our thousand fires shimmering as one
