

# New World Order

## Threat Signal

Realize there's something more than meets the eye  
Hidden signs that justify propaganda, lies  
You are told what to believe  
Look beyond the face of reason and see the hate behind  
Command the weak and send the strong to die  
I won't kneel before this god

Take my rights  
Take my pride  
Just try to take them from me  
Take my blood  
Take my veins  
But I'll take my soul with me

Starvation, war and disease are their plans to rid the earth  
Depopulation plans ready to disperse  
Speak now or forever hold your peace

Control us then break us down  
Your sins won't wash away

Distractions lead us away and then keep our minds concealed  
For those who have eyes to see, truth will be revealed  
The signals of impending threat  
Dictate society and turn us against ourselves  
Subliminal thoughts alter all our mental health  
I won't kneel before this god

Take my rights  
Take my pride  
Just try to take them from me  
Take my blood  
Take my veins  
But I'll take my soul with me

Control us then break us down  
Your sins won't wash away  
Destroy us and kill us off  
Your sins won't wash away  
Controlled by fear

Their agenda will never be known until the twelfth hour has shown  
A new world, a new order, big brother is watching us all
