

## In The Sand

Three Days Grace

Chew me down why won't you chew me up  
Drain me out like I'm like a plastic cup  
You step your way and then I'll step mine  
Everything's gonna change this time

Can't you see all that I've done wrong  
Why can't you stay along  
Screaming back at an empty space  
Well, take me out like a thought without a trace

How long will it take before you realize  
It's not that hard to walk the sand  
How long will it take before you realize  
I finally found the part in the sand

Troublesome can make you very bad  
Take for certain the things that you never had  
You say you need them all your pretty lies  
When they finally caught you  
Oh, you never tried

Can't you see all that I've done wrong  
Why can't you stay along  
Screaming back at an empty space  
Well, take me out like a thought without a trace

How long will it take before you realize  
It's not that hard to walk the sand  
How long will it take before you realize  
I finally found the part in the sand

How long will it take before you realize  
It's not that hard to walk the sand  
How long will it take before you realize  
I finally found the part in the sand

The sand, the sand, the sand  
Yeah, yeah, yeah  
Found the part in the sand  
Yeah

I finally found the, I finally found the, I finally found the  
The part in the sand  
I finally found the, I finally found the, I finally found the  
The part in the sand
