

# Redemption

## Three Days Grace

I know sorry is not enough  
To erase all the pain from when I messed up  
I'm not here to overturn my conviction  
These eyes are on the road  
The road to redemption  
Well it's only until you lose  
Everything that you love that you're forced to choose  
And there's nothing like a crash to get your attention  
To keep you on the straight  
The road to redemption

I know there's nights when it felt like living hell  
All those nights when I almost killed myself  
In the end you never left  
When I needed your forgiveness

It's a long way down from the fall  
And the terrible truths, ya I own them all  
And I had to hit the bottom to change my direction  
To find my way back  
Back to redemption

I know there's nights when it felt like living hell  
All those nights when I almost killed myself  
In the end you never left  
When I needed your forgiveness

When everyone left me for dead  
You never gave up, you never quit  
I remember the words you said  
We can still be good again

Now I'm looking you in the eyes  
My soul on my sleeve, nothing more to hide  
And I'm never going back to that condition  
You showed me the way to redemption

I know there's nights when it felt like living hell  
All those nights when I almost killed myself  
In the end, you never left when  
I needed your  
I needed your forgiveness
