

Karma Kills

Through Fire

Tell me how you've been sleeping
In this mess you made
The devil's got you dreaming
Your nightmares wide awake
So you can keep on running
Away from all your sins
But when the bed is burning
You'll be your own revenge

Anything you do in the darkness
It'll still be there in the morning light
Never any hope for the heartless

What comes around goes around
What's going up's coming down
Skeletons are moving through
You're gonna get what's coming to you
I'm gonna get my thrills
Karma kills
Karma kills

You always say you're sorry
But don't apologize
You've had a second chance
One too many times

Now there is no remedy
For your self-inflicted misery
(Misery, misery)

What comes around goes around
What's going up's coming down
Skeletons are moving through
You're gonna get what's coming to you
I'm gonna get my thrills
Karma kills
Karma kills

Was it worth it?
Breaking all the trust
Was it worth it?
Ash to ash, dust to dust

Anything you do in the darkness
It'll still be there in the morning light
Never any hope for the heartless

Anything you do in the darkness
It'll still be there in the morning light
Never any hope for the heartless

What comes around goes around
What's going up's coming down
Skeletons are moving through
You're gonna get what's coming to you
I'm gonna get my thrills
Karma kills

Karma kills
Karma kills
Karma kills
