

## Echoes

### Throw The Fight

I'm a failure in your eyes  
Just a waste of space  
Never wanted to be different  
All I wanted was to fit in  
You tell me how I'll always fall down  
Be a victim of your system  
I've been fighting for my whole life  
But now I'm gonna bleed out

So put your fists up  
Watch the pills fall  
Take my life into your hands  
And let it all go

So put your fists up  
Watch the blood flow  
Put my life into your hands  
And let it all go

I am barely breathing in this paradise called Hell  
Fight depression with your weapons, take your medicine tonight

I've been walking down the same road  
Chasing dreams again  
I can't pretend that I'm worth it  
But I will die to say I tried  
Were a casualty and victim  
To a world that plays the witness  
Show me that I'm more than a prescription

So put your fists up  
Watch the pills fall  
Take my life into your hands  
And let it all go

So put your fists up  
Watch the blood flow  
Put my life into your hands  
And let it all go

I am barely breathing in this paradise called Hell  
Fight depression with your weapons, take your medicine tonight  
I've been waiting for the right time  
Just to let it all fall down  
Broken needles fill the cities  
Watch the homeless starve tonight

Let it all go

So put your fists up  
Watch the pills fall  
Take my life into your hands  
And let it all go

So put your fists up  
Watch the blood flow  
Put my life into your hands

And let it all go

I am barely breathing in this paradise called Hell  
Fight depression with your weapons, take your medicine tonight  
I've been waiting for the right time  
Just to let it all fall down  
Broken needles fill the cities  
Watch the homeless starve tonight
