

# The Fallout

## Throw The Fight

(One by one we fall)

Always think before you speak (watch for the fallout)  
Lost in the eyes of the storm  
See the future in the palm of your hands  
Lightheaded, not part of the plan  
The sky at night goes black

One by one we fall  
Placing bets, risking it all  
One by one we fall  
One by one we fall

You see the lighthouse shining  
Light in the distance  
The sound of sirens, I can't save you  
Keep holding on

Sinking deeper into this depression  
Lightheaded, not part of the plan  
The sky at night goes black

One by one we fall  
Placing bets, risking it all  
One by one we fall  
One by one we fall

(One by one we fall...)

(One by one we fall)  
Placing bets, risking it all  
Placing bets, one by one we fall  
Placing bets, one by one we fall  
See the future in the palm of your hands (we fall)  
See the future in the palm of your hands
