

When the World Stops Spinning

Throw The Fight

Yea! Come on!

Bury me in the sand, stick your needles within

Taste this blood from my arm watch the chemicals spin

My whole life is a dream faded pictures and memories

scattered out on the floor I can't breathe

give me some hope stand in the light

How do I see how do I believe when the world stops spinning on its axis

how do I feel I don't know what is real when the world is made up of such sadness

give me some hope stand in the light

Tell me I'll see you tomorrow tell me I'll see you

When you're broken inside and you can't find your pride

count the scars on your arms wipe the tears that you're crying

Your whole life is a scene making friends that are enemies

Faking that your ok you can't breathe

give me some hope stand in the light

How do I see how do I believe when the world stops spinning on its axis

how do I feel I don't know what is real when the world is made up of such sadness

give me some hope send in the light

Tell me I'll see you tomorrow tell me I'll see you tomorrow tell me I'll see you

Keep on breathing just scream don't give up on me now

keep on breathing just scream don't give up on me now up on me now

Give me some hope stand in the light

How do I see how do I believe When the world stops spinning on its axis

How do I feel I don't know what is real When the world is made up of such sadness

Give me some hope stand in the light

Tell me I'll see you tomorrow tell me I'll see you tomorrow

tell me I'll see you tomorrow Tell me I'll see you tomorrow tell me I'll see you
