

## Got Love

## Thundamentals

I got love  
One love  
And that's it  
Take your fist and make a peace sign with it

I'm stoked to be living in a lucky country  
It's just a joke that we're governed by a bunch of monkeys  
Still I'm loving all the listeners, you matter to me  
I got love for all the fishes in the Barrier Reef  
A big-it-up for my fellow man, who gives a damn  
If you're black, white, or yellow man  
Imma keep it mellow man  
Ain't about the melanin  
And I believe in the phrase  
"Stand for something or you might fall for anything"  
So find me standing on my own two feet  
Put my feet in your shoes, am I going to do?  
You can walk a mile in my boots  
I could do the same thing  
And see how life is for you  
That's true and  
Can you imagine a world without borders?  
I can imagine my girl with two daughters  
What would you do to keep your family free?  
Way I see: we're apart of one family tree  
I got love

Just for once  
I wanna say I'm one of the lucky ones  
Jet setting just to tell them where I'm coming from  
Few laps around the country but who's counting  
Got love for the city and love for the Blue Mountains  
A change of scenery, to where I need to be  
Meet the locals and sample the greenery  
To me, everywhere I go is unique  
Turn over a new leaf, feel the vibe on my frequency  
I used to only ever see the negative  
Always tripping out what I didn't have  
Now I realize what the lesson is  
So I'm kicking back and giving thanks  
All I need is one mic, one stage  
A one night stand with your town  
And the walk-of-shame down the runway  
Means more than I can say  
Till I make the hall of fame  
It's one love, one day  
I got

Somebody chuck me the manual to this life bizz  
I must admit, I kind of suck at it but  
Can you tell someone to hand me the mic quick  
Quite nice with it, let me run that lip  
That's all G, T.U.K.A, I rap for me  
Thundacats understand it was Ye who came late and thank Matt Corby  
Much respect to the bugger man  
Keep it on the humble and  
Big love to the people in the struggle and

Trying to flee the motherland  
And I don't want to rub it in  
But it's fucked how you're treated by my government  
We seem to point the finger at the scapegoat  
Even though we're sinking in the same boat  
While the cynic plays the victim with a halo  
I pray to God you find a safe place home
