

# Pariah

Thunder

Stay there, nice and far  
They know your kind, they know what you are  
Move along, just get away  
There's nothing here for your like today

So don't believe they're gonna catch you when you fall  
You're getting nothing out of it at all  
'Cause they're giving nothing up especially for you, pariah

You're out there on the street  
In a driving, raining, winter sleep  
If we can't put a roof over your head  
What kinda world are we creating?

I guess not everyone believes you have the right  
They call you a burden and a parasite  
If they could only see one cold night in your place, pariah  
Ooh, pariah

Sleep beneath the stars  
Oh yeah  
Till you've forgotten who you are  
Who you are

So don't believe they're gonna catch you when you fall  
You're getting nothing out of it at all  
'Cause they're giving nothing up especially for you, pariah  
Ooh, pariah  
That's what you are  
Pariah
