

## Collateral Damage

Thy Disease

Liberation is a fiction  
Implementing of a foreign rule  
They are hostile  
In those desert lands

There are no universal values  
Dogmatic point of view  
Arrogant force arouses resistance

All the resistance is pointless  
Supporting rebels is a treason  
Who wow i submit to us is a terrorist  
And will be treated as such

Invincible armed forces  
Use of guided munitions  
Exceptional display of force  
Civilians die

You're going down motherfucker  
You're going down  
You're going down motherfucker  
You're going down

So called "collateral damage"  
Praise and hurt  
Liberation is a fiction  
Implementing of a foreign rule
