

Crashing the Soul

Thy Disease

This black mask of fear
Throughout centuries is reborn
The voices!
Feel my blasting breath
Burning you in flames

Burning - in eternal march to death

I'm here to crash your soul!

I'm at one with the time
I share every cell of shameful life
In sticky embrace of my poisoned love
Lies painful fear which I have spawn
(in sticky embrace of my poisoned love!)
Where is found this unseen dark?
Which devours our souls from inside

It destroys being form inside
In the name of it's father - hate
And spirits - lies
(lies painful fear which I have spawn)

Burning - my name will be unspoken
