

Something Else

Tiara Thomas

Took a trip out to LA
Just to give us both some space
Text you straight up off the plane
Start some shit just for some conversation

We don't solve our problems
We ride around in that Escalade
Now you go fuck with what's-her-name
Even though you know we didn't break up all the way

We said a billion things
Can't be apart
I worry cause sometimes you go too far (too far, too far)
Just to break my heart like crazy

You know you're something else (something else)
Something else (something else)
Something else (something else)
You know you are, and I don't know if that's a good thing, baby
But you're something else (something else)
Something else (something else)
Something else (something else)
Something else

Stuck on you like you glued me
Tell me why we can't be like a movie
Does a love like that even exist, oh?
And you got a strong arm
So I put my armor on
We're heading through another storm
And a love like that will leave you drenched

We said a billion things
Can't be apart
I worry cause sometimes you go too far (too far, too far)
Just to break my heart like crazy

You know you're something else
Something else (something else)
Something else (something else)
You know you are
And I don't know if that's a good thing, baby
But you're something else
Something else (something else)
Something else (something else)
Something else (You are)

You know you're something else
Something else
Something else
