

This Christmas Time

Tide Lines

Mist over the chimney tops
Frost on every car that stops
And the market square is swinging
This city scene's a world away
From what you want on Christmas Day
Did someone say the bells were ringing?

You wanna go home tonight
You wanna go home tonight, home tonight
But home's a long way off now

Oh, when you close your eyes this Christmas time
It's everything you're missing
Oh, when you close your eyes these city lights
Start fading in the distance

Man orders another drink
Couples waltz on the skating rink
And the big wheel turns above them

He says he's full of season's cheer
As he downs another beer
And prays for someone to love him

Oh, when you close your eyes this Christmas time
It's everything you're missing
Oh, when you close your eyes these city lights
Start fading in the distance

For all the friends that are lost and gone
And all the years that are yet to come
We'll bring them in like old companions

You wanna go home tonight
You wanna go home tonight, home tonight
But home's a long way off now, home's a long way off now

Oh, when you close your eyes this Christmas time
It's everything you're missing
Oh, when you close your eyes these city lights
Start fading in the distance
Oh, when you close your eyes this Christmas time
It's everything you're missing
Oh, when you close your eyes these city lights
Start fading in the distance
