

Light Years Away

Tiësto

I feel the sky falling down
I'm picking up the pieces left on the ground
And some days were very long
I don't know where I'm meant to belong

Don't you hide from me
And don't you erase
What we used to be
Yesterday - it's far away
I'm lost in space

But the fire's burning
The fire's burning

Oh, I feel this love and I'm not giving up
There's nothing left for me to say
I'm reaching up 'cause we're burning now
A million light years away
It's pulling me like gravity
It's telling me it ain't over
Light years away
Light years away

Satellites are crashing down
I watch you disappear at the speed of sound
I was feeling out - of control
And where my heart lays
Now a black hole

Miles and miles away
closing my eyes
Just to see you again
Memories are not enough
To leave me with

And my fire's burning
The fire's burning

Oh, I feel this love and I'm not giving up
There's nothing left for me to say
I'm reaching up 'cause we're burning now
A million light years away
It's pulling me like gravity
It's telling me it ain't over
Light years away
Light years away
