

Over for Good

Tiffany Alvord

The rain pours and I'm drowning
'Cause I never thought we would
Be standing here like strangers
And be over for good

After we part ways
Decided that we need space
No one else gets who I am
And when I feel my heart ache
Wishing this was all fate
I'll keep on telling myself that you'll come back

So where does that leave us if we can't be us
Is it really over for good? Over for good
Oh oh, ooooh ooh, yeah yeaah

Will you turn around?
Will you fix all that you broke?
I know for a matter of fact
We were struggling, but I've got hope

After we part ways
Decided that we need space
No one else gets who I am
And when I feel my heart ache
Wishing this was all fate
I'll keep on telling myself that you'll come back

So where does that leave us if we can't be us
Is it really over for good?
And where does that leave us here without your love
If only you did what you should
Then it wouldn't be over
For good

And it's pounding through my head
Like a siren, lights are flashing red
Feels like I'm dying
Always loved you like I should
And it kills me to say
We're over, over for good

So where does that leave us if we can't be us
Is it really over for good?
And where does that leave us here without your love
If only you did what you should
Then it wouldn't be over
For good

Ooh ooh, ooooh-over, over for good
