

# The Heart Of Love

Tiffany Darwish

In the midst of a smokey room  
It feels like a dangerous night  
A girl could go blind just looking at you  
And looking straight into her life  
You always seemed to be so secure  
As if you didn't really need  
How could I know that someone like you  
Would be looking for someone like me  
I know that we can make it  
Through the laughter and the tears  
Reaching out in the night  
With our love, we'll survive  
It feels so good to know somebody cares

Let's get to the heart of love  
Find out what we really need  
Straight to the heart of love  
To the point where lovers meet, oh yeah  
Let's get to the heart of love  
Get us through this lonely night  
Get to the heart of love, and  
everything will be alright

Hungry eyes fill the room  
As we pull each other out the door  
In our lives we bend no rules  
And we're the only ones who know  
This one could last forever  
Through the laughter and the tears  
Reaching out in the night  
With our love, we'll survive  
It feels so good to know somebody cares

Let's get to the heart of love  
And find out what we really need  
Straight to the heart of love  
To the point where lovers meet, oh yeah  
Let's get to the heart of love  
Get us through this lonely night  
If we could just get to the heart of love  
Everything will be alright

Straight to the heart of love  
Straight to the heart of it  
Straight to the heart of love  
Oh yeah!

Ooh, ooh, ooh  
Take me, take me, take me, take me there

Straight to the heart of love  
To the point where lovers meet, oh yeah  
Let's get to the heart of love  
If we could just get to the heart of love  
Everything will be alright
