

# I Love You

Tiffany

Hanging on to words you said  
In the dawn the other night  
Maybe time will clear my mind  
And I won't feel so numb inside

Running blind but still I know  
It's killing me to let you go

I love you

There's no words that just not rhyme  
I was a moment in your life  
Every day will be the same  
And everywhere I see your face

Running blind but still I know  
I killed my dreams to let you go

I love you  
I love you

Hanging on to words you said  
Just memories in my mind  
Every day just the same  
Everywhere I see your face

So blind just from hanging low  
I killed my dreams to let you go

I love you  
I love you

I know in my heart  
I've loved you from the start  
But there's nothing I could do  
To make you my truth

I love you  
I love you  
I love you  
I love you

I love you
