

Young and Crazy

Tigertailz

Started young and we wanna rock
To the top, you know we're never gonna stop
Take it away to the sound of today, yeah
Turn you around
You know that there's no comin' back

Take a ride in a big black car
Tell ya friends you know you're gonna be a star
Loaded and wild on a downhill ride
Gun at your head, you know that life's a suicide
When you're hot you're living on the run
Never stop, you're like a loaded gun
Stab in the back, you're on a one-way street
Tonight, cruisin' in the summer heat

Young and crazy
Ain't no time to settle down
Young and crazy
Livin' fast and foolin' around

Flick of the wrist and we're feelin' hot
Like a death wish and give it all you got
Don't look back, you gotta face today

Outta my way, oh, babe
You know we're here to stay

Wild and hot, you're living on the run
Never stop, you're like a lo-lo-loaded gun
Stab in the back, you're on a one-way street
Tonight, cruisin' in the summer heat

Young and crazy
Ain't no time to settle down
Young and crazy
Livin' fast and foolin' around
Young and crazy
You're not the only one in town
Young and crazy
Make it quick, don't quit now, no!
Young and crazy
Ain't no time to settle down
Young and crazy
Livin' fast and foolin' around
Young and crazy
You're not the only one in town
Young and crazy
Make it quick, don't quit now, no

Young and crazy, oh-whoa-whoa...
