Dose

Tilian

Stop, don't save yourself
Don't run away, oh, stay with me
I'll care for you
We'll dose away the blues

Baby, this tastes a little different
The words will leave a little imprint
Don't worry, technically you're sentient
Soon you'll feel ordinary
We're gonna keep that fever running
(I'll take care of you 'til you're okay)
Gonna keep that fever running
(You'll need me more every passing day)

Don't believe in reason
Only I can keep you wheezing, honey
I am never leaving until you
Stop breathing

Stop, don't save yourself
Don't run away, oh, stay with me
I'll care for you
We'll dose away the blues

Calibrate, calibrate your soul (Soul)
Not sorry
Gonna make, gonna make you whole
Any time now
Baby, this taste a little different
The words will leave a little imprint
Don't worry, technically you're sentient
Soon you'll feel ordinary

Don't believe in reason
Only I can keep you wheezing, honey
I am never leaving until you
Stop breathing

(Don't save) Don't save, don't save yourself
Don't run away (Don't run away)
Stay with me, I'll care for you
We'll dose away the blues

Breathe, breathe faster
Breathe, breathe faster
Breathe, breathe faster
Breathe, breathe faster
(You need me)
(Need me)
(Need me)

Soon you'll feel ordinary
Soon you'll feel ordinary
Soon you'll feel ordinary
Soon you'll feel ordinary
