# Drift

**Tilian**

Another four years passing by on the coldest night
Can't find the keys to your heart and that's alright
Remember the signs were both stuck out like crooked teeth
The light of the sun can't bring your eyes back onto me

Let it just drift away
We can just watch this fade
Drift away
We can just watch this fade

You know I never really meant to square you in my sights
Don't wanna keep hanging on for a compromise
And so many times we doubled back to find new life
And now we're too far away to find the starting line

Let it just drift away
We can just watch this fade
Drift away
We can just watch this fade

Can't stand on my feet too long
World on fire and I'm singing songs
About you again
You know I can't promise you anything
Swimming out to the deepest end
Hold on tight as the current flows
To the bitter end
Now I'll tell lies to myself again

Let it just drift away
We can just watch this fade
Drift away
We can just watch this fade
