

Take You There

Tilian

Don't change your mind
Come down to Mexico
So sick of California
That glaze in your eyes
Is not irreversible
This ain't the devil I remember

Don't bother looking for something to save you
I want to save us too
We'll take our time, no need to give into pressure now
No pressure

Wherever you want to go
I'm not about to say no
Our love is an open road
But when did it get so cold?
Where you want to go
I'll take you there
I'll take you there
(I'll take you there)
I'll take you there

Long for the nights
It came so natural
So caught up in the moment
That gaze in your eyes
Was irreversible
And it's a devil I remember

Don't bother looking for something to save you
I want to save us too
We'll take our time, no need to give into pressure now
No pressure

Wherever you want to go
I'm not about to say no
Our love is an open road
But when did it get so cold?
Where you want to go
I'll take you there
I'll take you there
(I'll take you there)
I'll take you

Your body my caution all away
Beauty let my weaknesses escape
Let my emotion get the best of me
Thought we were feeling love we couldn't fake
I guess I thought you'd feel the same
Let my emotion get the best of me

Wherever you want to go
I'm not about to say no
Our love is an open road
But when did it get so cold?
Where you want to go
I'll take you there

I'll take you there
(I'll take you there)
I'll take you there

Your body my caution all away
I'll take you there
Thought we were feeling love we couldn't fake
I'll take you there
