

## Torch

Tilt

Anger used to serve me well  
It provided much needed fuel  
But now it keeps me bloodied  
Black in every avenue  
Wrapped up in my reason  
Till I can't prioritize  
Blinded to the potential in your eyes

We're marching down the street  
We brandish clubs and guns and knives  
?? step willing  
As to sacrifice our lives  
Descend upon the corner bar  
To drink and be ??  
And pick the lucky next one to terrorize

I know, I know  
I'm running with and empty light  
Health and fury burning bright  
I know, I know  
I could leave it all behind  
If I threw this torch I bear aside

It's easy in your righteous quest  
To forget the golden rule  
Your malice and your discontent  
Will never see you through  
Choose your battles carefully  
It's a ?? you can see  
Heal yourself before looking for ??
