

Figure A

Tim Atlas

You said you need me
But you don't care
If you don't want me
Then I don't care

Drained of feeling
Hear me calling
You don't need to feel the pain
Tomorrow I'll borrow your love and
Turn you back a page

All my life I've seen it black and white
With things that saturate my blinded eyes
So rearrange the colors in my mind
Figure it out, figure it out, figure it out, figure it out now
Figure it out now

You always had me
Justify my loneliness
The things that haunt me in my head are the traces of this

All my life I've seen it black and white
With things that saturate my blinded eyes
So rearrange the colors in my mind
Figure it out, figure it out, figure it out, figure it out now
Figure it out now

What a beautiful way to waste the time
For the time to go nowhere

All my life I've seen it black and white
With things that saturate my blinded eyes
So rearrange the colors in my mind
Figure it out, figure it out, figure it out, figure it out now
Figure it out now
All my life I've seen it black and white
With things that saturate my blinded eyes
So rearrange the colors in my mind
Figure it out, figure it out, figure it out, figure it out now
Figure it out now
