

Ramen

Tim Atlas

We've been working all day
Let's kick back and take a little break
The sunset is shining its light on you again
Download tell me everything
Highs lows and in betweens
You're in slow motion like a movie scene so beautiful
And I know everything is right where it should be

We're in the kitchen eating ramen
We've got a candlelit table set for two
I love our little apartment
'Cause it's making me feel so close to you
And now I'm taking a picture in my head
So I can remember this moment
Here in the kitchen eating ramen
Got everything I ever wanted

We were thinking the same thing
Let's tuck away all the pressure from outside
I wanna find your legs in the duvet 'til it's
Past 5 and the sunshine fades in
Baby my whole solar system
Revolves around you
And I know everything is right where it should be

We're in the kitchen eating ramen
We've got a candlelit table set for two
I love our little apartment
'Cause it's making me feel so close to you
And now I'm taking a picture in my head
So I can remember this moment
Here in the kitchen eating ramen
Got everything I ever wanted

Baby I've got all that I want
Oh baby I've got all that I need
Oh baby I know that we belong together

Baby I've got all that I want
Oh baby I've got all that I need
Oh baby hope it feels like this forever
