

Stardust

Tim Atlas

Cinematic

It's the way you move

In slow motion

What's your status

Are you tempted too?

Options open

We could break the atmosphere in two

Me and you, locked in like the sun and the moon

I get tangled by the way you bat your eyes

And the way you push your hair to the side

Wrap around me like stardust

Falling out of the sky

That's what it feels like

Feels like

Come on and wrap around me like stardust

Falling out of the sky

That's what it feels like

Feels like when you're mine

Psychedelic

How I melt with you

Can't stop trippin'

It's magnetic

All the push and pull

Take my attention

We could break the atmosphere in two

Me and you, locked in like the sun and the moon

I get tangled by the way you bat your eyes

And the way you push your hair to the side

Come on and wrap around me like stardust

Falling out of the sky

That's what it feels like

Feels like

Come on and wrap around me like stardust

Falling out of the sky

That's what it feels like

Feels like when you're mine

When you're mine

When you're mine

When you're mine

Mine
