

Fall In Love With Me

Tim Booth

Ease your lips into a velvet kiss
While I enfold you
Move your hands across this promised land
The seekers guided by the pole star
Say the words why don't you say the words
I have been waiting long to hear
Please fall in love with me

Drift with me upon an endless sea
We are divine in the realm of these senses
Every move has been subterfuge
While we pretend that we really dont care

Lose your fear we may be strangers here
But I can feel we might be one
Please fall in love with me

I hear the sound of moons falling
Surrender to this charm
I breeze across your soul darling
Deep eternity

Lost your mind well don't you think its time
To swim away from the saftey of these beaches

Trust the tides they know which way to flow
And don't you long to flow so far

Moved in waves we've never felt before
Till we are floating way out deep
Please fall in love with me
Please fall in love with me
Please, with me
