

# Gloria Descends

Tim Booth

Half moon bay looking up at the stars  
Hanging on a plank at the edge of the sea  
Praying that a shark doesn't read me as seal  
Shiva laughs in the curl of a wave, a wave  
Drag a breaker to carry me home  
Shift my weight to anticipate  
Permutate into a body of light  
As overhead the stars pulsate, pulsate

Out here in the oceans surf  
We're particle to waves  
Out here in the oceans surf  
We dream...

Glory descends  
Glory embraces you  
Her Glory descends  
Glory through my guards  
No alone when you know there is only one, is one, is one

Here I is one and one is we  
Here I is star lights devotee  
Here I is dream

Glory descends  
Glory embraces you  
Her Glory descends  
I'm just passing through  
Glory descends

Walks right through my guards

No alone when you know there's only one, is one, is one

I know nothing

I know I know nothing

I know I know nothing

I know I know nothing

I know I know nothing

I know I know nothing

Glory descends

Glory embraces you

Her Glory descends

I'm just passing through

Glory descends

Walks right through my guards

No alone when you know there's only one, is one, is one

Glory descends

All is Gloria

No alone when you know there is only one is one is one
