

## Currents

Tim Finn

When I let go  
Of all my desperate schemes  
I felt the floor  
And followed my dreams  
Then I met you  
You came right of the blue  
A guiding star  
Shining and true

The currents will carry you  
The currents will carry you away  
You don't have to hurry  
There's no need to worry  
The currents will carry you away

And even when  
You've lost all hope that it's true  
The one you love  
Drifts into view

The currents will carry you  
The currents will carry you away  
You don't have to hurry  
There's no need to worry  
The currents will carry you away

Not much so sweating as being swept along  
The currents will carry you

Hanging in the ocean  
Like an astronaut  
To a higher thought

The currents will carry you  
The currents will carry you away

The currents will carry you  
The currents will carry us anyway
