

Let's Just Drink

Tim Hicks

California's on fire
There's crazies blowing up the middle east
The tax man's blowing up my iPhone 4
And my girl won't give it no peace
They cut my hours down at tire town
My bank account's on the brink
And all hell's breaking loose
On the six o'clock news
So to hell with it, let's just drink

Let's just drink about it
And everything will be just fine
And even if it ain't and nothing don't change
Well I'll be feeling alright
So pass me a cold one and let the world go down the drain
There's nothing else to do
When the mountains turn blue
So to hell with it, let's just drink

My landlords raising the rent
And my transmission keeps on slipping
Politicians talk till they're blue in the face
But they don't do a whole lot of fixing
My football teams 0-13
My grandma can beat 'em I think
And my bass boat's got big hole in the bottom
So to hell with it lets just drink

Let's just drink about it
And everything will be just fine
And even if it ain't and nothing don't change
Well I'll be feeling alright
So pass me a cold one and let the world go down the drain
There's nothing else to do
When the mountains turn blue
So to hell with it, let's just drink

Yeah we're all good
Even though we ain't good
'Cause the beer's good
Oh, so to hell with it let's just drink

Let's just drink about it
And everything will be just fine
And even if it ain't and nothing don't change
Well I'll be feeling alright
So pass me a cold one and let the world go down the drain
There's nothing else to do
When the mountains turn blue
So to hell with it, let's just drink
There's nothing else to do
We're all totally screwed
So to hell with it, let's just drink
